

## Power Busbar Cable End Connector

### OVERVIEW

Luxshare-TECH's power busbar connector, its contacts with very high conductivity pure copper. Silver plating and independent support beams enable the current carrying capacity up to 200A and independent helper springs ensure contact with busbar when busbar insert into it from nonparallel position. The contact beams with "independent" stainless steel helper spring clip ensure proper normal force level and very low, stable contact resistance for each contact beam in product life cycle.
